Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-46</u>	YES
	Claims	<u></u>	NO
Inventive step (IS)	Claims	<u>1-46</u>	YES
	Claims	<u></u>	NO
Industrial applicability (IA)	Claims	<u>1-46</u>	YES
	Claims	<u></u>	NO

2. Citations and explanations (Rule 70.7)

The US patent US5804949A (mentioned in the application description) appears to disclose the prior art closest to the present application. Independent claims 1 and 23 appear to be delimited in relation to this prior art. The present invention is distinguished from this prior art by the characterizing features of claim 1 and by the characterizing features of claim 23.

The problem to be solved by the present invention can therefore be regarded as that of damping torsional vibrations in the drive train.

The solution provided by the characterizing features of claims 1 and 23 is that of generating a damping torque in a fixed relation to the angular velocity of the torsional vibration (i.e. in counter-phase thereto), and applying this torque to the drive train.

The presently available prior art in form of the documents outlined in the description and those cited in the search report does not contain anything which could give rise to an objection with regard to either novelty or inventive step.
